## **Mark your calendars!**

***February 28 - March 8, 2006***

**Public Works Trust Fund (PWTF)  
&  
Drinking Water State Revolving Fund (DWSRF)  
Application Workshops**

---

The Public Works Board and its partner the Department of Health are pleased to announce the annual application workshops.

The Workshops are structured into two sessions:

- PWTF 2007 Construction Application
- DWSRF 2006 Construction Application

Visit our websites and download  
applications

# PUBLIC WORKS BOARD - INVESTING IN WASHINGTON

## **PWTF 2007 Construction Application**

The Public Works Trust Fund (PWTF) provides low-interest loans and technical assistance to local governments for critical public works needs. The PWTF is in its twenty-first year, assisting local governments in financing over 1,500 infrastructure projects totaling \$1.7 billion in PWTF funding.

Come and hear all about the changes to the application and what it means to you and your project.

The PWTF is an extremely competitive program. If you manage a local government or are responsible for the infrastructure in your community, then you'll want to sign up for the workshops and learn the in's and out's of completing a competitive application. Hear how other communities have solved similar problems. Meet with your Client Service Representative and learn how they can assist.

There is approximately \$65 million available this funding cycle. Borrow up to \$7 million dollars with as little as 0.5% interest. Whether you are planning a project, or are ready to start construction, the PWTF has a loan program to fit your need.

### **Local Infrastructure Needs Assessment System (LINAS)**

The Infrastructure Assistance Coordinating Council (IACC), the Transportation Improvement Board, and the Public Works Board have created the web-based Local Infrastructure Needs Assessment System (LINAS). LINAS will enhance coordination between local jurisdictions, state and federal infrastructure programs, the Legislature, and the Governor. The system will track local infrastructure projects for the years 2004 to 2009, then 2005 to 2010, and so on. Information being collected includes the name of the project, the estimated cost, and the funding source(s). The information will be available on-line to everyone; with the ability to sort by jurisdiction type, system, year, funding source, county, or legislative district. To date, we have collected information from 313 jurisdictions. Do we have your information? If not, please bring a copy of your latest plan and hear how LINAS will provide better information to the Legislature, the Governor and the public.

Call today to request your application

## **DWSRF 2005 Construction Application**

The Drinking Water State Revolving Fund (DWSRF) finances capital construction costs to improve water quality for your consumers and improve your compliance with drinking water regulations. Your water system may be eligible for a low-interest loan to fund a project such as a treatment facility, water main replacement, a new reservoir or a security project that supports protection of public health and safety.

The program is gearing up for the 2006 loan cycle. Approximately \$20 million will be available to fund drinking water capital construction projects. The program's goal is to increase public health protection and drinking water system compliance.

Washington is a national leader in getting these funds out to public water systems. Over \$180 million dollars have been committed to drinking water infrastructure improvements in Washington since the program was introduced in 1997.

### **New Requirement Update**

For both the PWTF and DWSRF programs, new requirements for the preservation of historic properties and cultural artifacts will be reviewed at the workshop.

Applications are due May 8, 2006

***PWTF Application has changed,  
come to the workshops and learn all about the changes!  
Also, changes in requirements for the PWTF program regarding Section 106***

Please fill out and mail or fax to:  
Public Works Board
